References per request.

Summary

Motivated computer science major with a 4.0 GPA and AI Certificate in progress with hands-on experience in C++, Python, and full-stack web development. Seeking internship to contribute to real-world software engineering projects so as to apply practiced skills in a professional environment.

Education

B.S. in Computer Science at UMSL (In Progress)

Expected Graduation Spring 2027

(Mathematics Minor and Certificate in Artificial Intelligence)

A.S. in General Stem Transfer Studies

December 2024

Graduated Summa Cum Laude from St. Louis Community College

Relevant Coursework: *Object-Oriented Programming, Full Stack Web Development, Linux Environment & Programming, C/C++ For Advanced Programming, Design and Analysis of Algorithms*

Projects

Chip8 Interpreter • C++, SFML

[Github Link ↗](#)

- Engineered and developed a command line interpreter for the Chip8 programming language using SFML including CPU emulation, memory management, and display rendering.
- Included command line arguments for full user control of the interpreter. This includes a step mode, emulation speed controls, and interpreter appearance settings

Lexicographical Analyzer • C++

[Github Link ↗](#)

- Implemented a lexicographical analyzer for a theoretical C based language.
- Included tokenization for identifiers, keywords, numeric and string literals, and special characters, all with error management.

Paint Blob Simulation • Python, Matplotlib, TKinter

[Github Link ↗](#)

- Worked with a team to design and program an interactive simulation of paint blobs falling randomly on a canvas.
- Includes GUI built with TKinter, full animation of simulations, and statistical analysis of simulation data through key stats and diagrams.

Wandering in the Woods • Python, Matplotlib, NumPy

[Github Link ↗](#)

- Worked with a team to design and program an interactive simulation of two strangers moving randomly on a grid until meeting.
- Includes statistical analysis of simulation data through key stats and diagrams output to a file.

Skills

Programming Languages: *Python, C/C++, C#, Java, HTML/CSS, JavaScript, SQL*

Technologies: *Git/GitHub, React, Node.js, Express.js, REST APIs, Linux/Bash, Unity Game Engine, Docker*

Core CS: *Data Structures and Algorithms, OOP, Systems Design*

Experience

Assistant Manager • Menchie's Frozen Yogurt Fenton, MO | August 2021 – Present

- *Onboard and train new hires, accelerating their ramp-up time*
- *Provide customer-facing service with a focus on personal connection*

Lighting Designer • St. Louis Community College Kirkwood, MO | October 2023 – Present

- *Engineer lighting designs for theatrical productions, programming cue stacks and coordinating instrument rigging and focus*
- *Collaborate directly with directors to translate their creative vision into reality*
- *Manage competing technical constraints under hard deadlines in a live performance environment*
